

3rd grade Summer Math Review

It is important to continue to practice our math skills over the summer. I have included an optional pdf packet with worksheets that review math standards. I also linked different online math games that students can use to practice their skills over summer. Besides, the pdf and websites I encourage all students to practice their skip counting. (Example of skip counting- 3,6,9,12,15), and math facts. This will help students with multiple math standards. Have a wonderful summer and I can't wait to see you all in the Fall!

PDF review packet
